

## A WORD FROM THE PASTOR

AUGUST 2008

Our renovation program is moving along nicely. All of the impact-resistant windows have been installed into the Narthex and Sanctuary windows and are ready to have the stained glass windows re-installed. The Bell Tower has been completely refurbished and painted. The outside walls of the Sanctuary have been primer coated, sanded and received two coats of fresh white paint. All of the windows are sealed and water resistant. A new carpet will be laid soon in the Narthex and the new all-metal front door will be painted red. We should be able to use the front door to the church within a couple of weeks.

The new tile floor has been laid in Fellowship Hall and all of the new appliances are installed. The walls have been newly painted and new metal doors installed.

Stan Kanning built a replacement Lectern for the Sanctuary which matches the Baptismal Font. It has a built-in microphone and is a beautiful addition to our worship.

Four new stained glass windows will be installed in the Sanctuary by late this month. One additional stained glass window has been subscribed leaving only seven windows left for subscription in the Sanctuary.

The four additional stained glass windows and Lectern will be dedicated to the Glory of God at a service later in the year.

Many of our people are away on vacation at this time and we are missing them; however, it won't be long until our seasonal members and regular members return.

As soon as the renovation program is completed we will post a picture of the church on this website. Look for it.

Faithfully,

**Pastor Bob+**
